Sourcecode polimorfishme overriding:
Super class
class hewan {
  public void suaraHewan() {
    System.out.println("Hewan bersuara");
  }
}
Sub class
class kuda extends hewan {
  @Override
  public void suaraHewan() {
    System.out.println("Kuda bersuara: hikhikhik");
  }
}
Sub class
class ayam extends hewan {
  @Override
  public void suaraHewan() {
    System.out.println("ayam bersuara : kukuruyuk");
  }
}
```

Nama: Abdul Latif

subclass

```
class main {
  public static void main(String[] args) {
    hewan hewanSaya = new hewan();
    hewan kudaSaya = new kuda();
    hewan ayamSaya;
    ayamSaya = new ayam();
    hewanSaya.suaraHewan();
    kudaSaya.suaraHewan();
    ayamSaya.suaraHewan();
}
```

Hasil dari polimorfishme overriding

Hasil polimorfishme overloading:
